Profile Summary

Full stack engineer with 9 years of experience building scalable web applications and backend services, now focused on shipping AI-enabled products. Strong foundation in Java (Spring Boot), Node.js and React, combined with hands-on delivery of generative AI systems – LangChain agent workflows, retrieval-augmented generation over enterprise data, and MCP servers that expose internal systems as governed tools. Comfortable owning a feature from data model to deployed Azure infrastructure, with evaluation and observability treated as first-class concerns. Domain experience across EV charging infrastructure, financial services and enterprise procurement.

Technical Skills

- **AI & Generative AI:** LangChain (agents & tools), RAG pipelines (chunking, embeddings, retrieval), Azure OpenAI, Azure AI Foundry, OpenAI & Anthropic APIs, MCP servers, Azure AI Search, prompt engineering, GitHub Copilot
 - **Languages:** Java, JavaScript, TypeScript, Python, SQL, HTML, CSS
 - **Backend:** Spring Boot, Node.js, Express.js, REST APIs, microservices
 - **Frontend:** React.js, Redux, React Native, Tailwind CSS, Bootstrap
 - **Databases:** MSSQL, MongoDB, Redis
 - **Cloud & DevOps:** Microsoft Azure, Docker, serverless architecture, Jenkins
 - **Tools:** Git, GitHub, Postman, JIRA, VS Code
-

Work Experience

Software Technical Expert

Schneider Electric | Nov 2022 – Present | Bengaluru, India

- Led development of the eToolBox platform using Java (Spring Boot) and React.js.
- Architected and implemented services for GCAD with Java and Node.js over MSSQL.
- Built AI-assisted workflows using LangChain agents and tools, chaining LLM reasoning with internal APIs to automate multi-step engineering tasks.
- Designed RAG pipelines over large internal document sets – chunking strategy, embeddings, vector retrieval and re-ranking – on Azure OpenAI and Azure AI Search.
- Developed MCP servers exposing internal systems as governed, reusable tools for AI clients.
- Enhanced the UI and resolved key defects in EcoStruxure EV Charging Expert 2.0, improving performance and user satisfaction.
- Designed and deployed supporting infrastructure on Azure Cloud.

Software Development Engineer II

Novopay | Mar 2022 – Nov 2022 | Bengaluru, India

- Developed backend APIs in Java and integrated them with React-based front ends.
- Built dynamic form rendering systems and performance management modules using React and Redux.
- Contributed to mobile development with React Native alongside backend services for financial applications.

Software Development Engineer I

Novopay | Feb 2021 – Mar 2022 | Bengaluru, India

- Created dynamic, reactive forms driven by metadata JSON schemas in React.
- Built the Novopay Lending Application from the ground up, across frontend and backend.

Full Stack Java Developer

Zycus Infotech | Sep 2019 – Dec 2020 | Bengaluru, India

- Developed REST APIs and backend logic in Java and Spring Boot for procurement systems.
- Created responsive enterprise UIs with React.js and Bootstrap.
- Automated testing with CodeceptJS, reducing manual testing time by 30%.

Full Stack Java Developer

Tata Consultancy Services | Sep 2017 – Sep 2019 | Bengaluru, India

- Built secure, scalable financial applications using Java, Spring Boot and SQL.

- Collaborated in agile teams to deliver production-quality software.
-

Education

B.Tech in Computer Science & Engineering

Asansol Engineering College, 2017

Certification

- Microsoft Certified: Azure Fundamentals (AZ-900)
